SUMMARY

Experienced QA Engineer with a strong background in manual and automated testing methodologies. Proficient in identifying and resolving software defects, ensuring high-quality deliverables. Skilled in creating test plans, executing test cases, and collaborating with cross-functional teams to drive product excellence.

SKILLS

Python, JavaScript, SQL, MySQL, Shell Scripting

HTML5, CSS3, JSON, XML, XPath

Selenium WebDriver, Selenium IDE, Unittest, PyTest, Robot

Postman, HammerDB, BrowserStack, TestSigma

GTMetrix, Lighthouse, Apache Jmeter, SpeedLab, Tosca

Snyk, Mozilla Observatory, Burp Suite

Jira, Zephyr, TestRail, ClickUp, Confluence, Swagger

MS Office Suit, Microsoft CRM, Git, Github, Tableau, AWS

EXPERIENCE

Apkudo --- 2020 - Present Technology Analyst

- Build comprehensive test automation with Selenium WebDriver
- Create tests for REST API with Postman with cloud-automated execution
- Perform mobile testing (stability, stress, and aging tests) for Android and iOS platforms
- Perform CTS and Attribution tests using ADB and shell scripting
- Perform front/back end performance and security testing
- Execute Black/White Box, Functional/non-functional End-to-End testing
- Execute automation security tests for web-based applications
- Perform complete functional back-end testing with SQL and MySQL
- Create and document QA Test Plans, Test Cases, and Test reports
- Write SOPs and bug reports while working with the development team to verify bug fixes

WirelessBuybacks --- 2018 - 2020

Software QA Analyst

- Conducted software testing of Android and iOS devices and compiled detailed bug reports
- Optimized manual testing by designing and implementing comprehensive test cases
- Executed manually and automated test cases ensuring coverage of software functionality
- Collaborated with cross-functional teams to review software requirements and specifications, providing valuable insights and feedback to enhance product quality
- Participated in team meetings to discuss testing strategies, share best practices, and contribute to continuous improvement initiatives within the software development lifecycle

Uber Technologies --- 2016 - 2018

Software QA Analyst

- Reviewed software features and functionalities to identify any bugs or issues.
- Executed test cases, reported defects, and ensured the quality of the app
- Contributed to the creation of test plans and ensured alignment between testing efforts and project goals.
- Managed risks and improved quality standards in an Agile environment
- Conducted root cause analysis on reported bugs, collaborating with developers to facilitate efficient issue resolution

Samsung Electronics --- 2013 - 2016

Manual Test Analyst

- Conducted software testing of Android smartphones and tablets
- Reviewed software requirements and specifications provided by the development team to ensure a clear understanding of the expected functionality.
- Collaborated with the development team to report and track defects, providing detailed information to assist in the resolution process.
- Contributed to improving testing processes by suggesting enhancements to test plans, procedures, and tools used in the testing lifecycle.

Beeline --- 2009 - 2013

Device Test Specialist

- Performing tests on various devices.
- Contributed to the strategic planning process by providing insights into emerging technologies and recommending updates to testing methodologies to stay ahead of industry trends
- Helped to develop and deliver training programs for the testing team, ensuring ongoing skill development and knowledge enhancement

Education

QA Automation Engineer Course at Silicon Valley CA, qasv.us – 2023 - 2024

Bachelor's degree in computer science, Georgia State University – 2005 – 2009

Bachelor's degree in banking and finance, Grigol Robakidze University – 2003 – 2007
