PROFESSIONAL SUMMARY

With extensive experience in testing, I specialize in creating precise automated testing solutions using tools like Selenium WebDriver and API testing frameworks. I navigate the complexities of software testing with attention to detail and maintain a mindset for continuous learning in this ever-changing field. My dedication to growth is evident in my testing approaches' reliability and enthusiasm for tackling new challenges and adopting emerging technologies.

TECHNICAL SKILLS

- **Automation Testing Tools**: Selenium WebDriver, Selenium IDE, PostmanAPI, Swagger, GTMetrix, Lighthouse, SpeedLab, BrowserStack, ADB, AWS, GCP
- **Programming Languages:** Python, JavaScript, SQL
- **Markup Languages and Other:** MySQL, XPath, XML, HTML5, CSS3, JSON, Shell Scripting
- **Methodologies:** Agile / SCRUM, Waterfall
- **Documentation Tools:** Confluence, MS Office, Google Drive, Notepad++, GitHub
- **Bug Tracking Tools:** Jira, Microsoft CRM, Confluence, ClickUp
- **Security Testing Tools:** Mozilla Observatory, Snyk
- **OS:** Windows, MacOS, iOS, Android
- **IDE:** PyCharm, VSC, WebStorm, Atom, Sublime Text, Chrome Dev tools, Jupyter Notebook, Notepad++

RECENT WORK EXPERIENCE

Apkudo   -   2020 – Present
Software QA Engineer
- Building Automation Front-End Cross-browser testing utilizing Selenium WebDriver Pytest framework.
- Creating Automation for REST API testing with Postman, Swagger, JSON, and CURL.
- Performing stability, stress, and aging tests for Android and iOS platforms using Raspberry Pi rack - APD (App Platform Dependability) and other internal tools.
- Performing CTS and Attribution tests using ADB and shell scripting.
- Writing QA testing documentation: Test Plans, Traceability Matrix, Test Cases, and Test reports.
- Executing Black/Gray Box testing, Functional, Smoke, Regression, UAT, UI/UX End-to-End testing.
- Utilizing Lighthouse, SpeedLab, and GTMetrix as part of website Functional testing.
- Planning and performing cross-browser and cross-OS tests using BrowserStack (Chrome, Firefox, Opera, Edge, Safari | Windows, MacOS, iOS, Android).
- Executing Automation Security testing for web-based applications with the Mozilla Observatory tool.
- Performing Back-end testing of SQL and MySQL Databases.
- Writing bug reports in Jira or ClickUp and working closely with the development team to verify bug fixes.

WirelessBuybacks   -   2018 - 2020
Software QA Analyst
- Conducted thorough software testing of Android and iOS smartphones and compiled detailed bug reports.
- Optimized manual testing by designing and implementing comprehensive test cases.
- Executed test cases manually and automated where applicable, ensuring thorough coverage of software functionality.
- Collaborated with cross-functional teams to review software requirements and specifications, providing valuable insights and feedback to enhance product quality.
- Participated in regular team meetings to discuss testing strategies, share best practices, and contribute to continuous improvement initiatives within the software development lifecycle.
- Conducted root cause analysis on reported bugs, collaborating with developers to facilitate efficient issue resolution and improve overall software quality.

Ilanga Group   -   2015 - 2016
Data Analyst
- Conducted thorough data cleaning and preprocessing tasks to ensure the accuracy and reliability of datasets.
- Utilized tools such as Tableau and Python for statistical modeling and hypothesis testing to support data-driven decision-making.
- Addressed missing values, outliers, and inconsistencies, enhancing the quality of analytical outputs.
- Created and generated comprehensive reports, summarizing key findings and trends for presentation to stakeholders.
- Developed and optimized SQL queries for efficient data retrieval and supported database-related tasks.

Beeline Georgia   -   2011 - 2015
Senior Device Test and Infrastructure Specialist
- Provided leadership and guidance to the testing team, offering expertise and mentorship to junior members.
- Contributed to the strategic planning process by providing insights into emerging technologies and recommending updates to testing methodologies to stay ahead of industry trends.
- Developed and delivered training programs for the testing team, ensuring ongoing skill development and knowledge enhancement.

EDUCATION
QA Automation Engineer Course at Silicon Valley CA, qasv.us - **2023**
BS in Business Administration and Management, Georgia State University – **2007**

LANGUAGES English, Russian, Georgian
